

7 TYPES OF DATA ANALYSIS

@permaculturewomen

DESCRIPTIVE:

Summarize the data.

What has happened and is happening now?

EXPLORATORY:

What questions can be asked?

What don't you know?

MECHANISTIC:

How does the system function?

Where can it be improved?

ORGANIC:

What organisms are involved?

How are they connected?

DIAGNOSTIC:

What are the problems?

How did they start?

PREDICTIVE:

What is likely to happen?

What will be the outcomes?

PRESCRIPTIVE:

How can we guide what happens next?

What's the plan?
